# TransactionRite

AXXIS BY OPIS, A DOW JONES COMPANY

Capture supplier transactions automatically, eliminating hours of manual processing and paperwork.

Axxis Software provides a solution for faster billing, more accurate payments and greater workforce efficiency.

#### Market Challenge

Transaction processing is a time-consuming chore for accounting, operations and dispatch teams at fuel companies. Documents come from different sources, at different times and at different levels of machine readability. For companies moving as few as 10 loads of fuel per day, the paperwork trail becomes almost impossible to manage manually.

#### How We Help

The TransactionRite module of Axxis Software automatically captures documents such as eBOLs, Invoices, credit card memos, EFTs, Secret Shopper reports and delivery tickets from messaging services, supplier websites and emails. The tool then translates and normalizes the data for accounting systems, reducing manual effort and allowing easy analysis, archiving, exporting and publishing.

#### Benefits

Reconcile accounts payable with electronic capture of invoices with automatic transfer to accounting systems

Access complete delivery information to accelerate the billing and collection cycle

Use OCR (Optical Character Recognition) to scan and validate nonelectronic documents, including exception reporting of missing or questionable data Who We Help Marketers Wholesalers & Jobbers

### Allocations Management

## CaptureRite

Capture BOLs and match against supplier posted volumes to validate supplier allocation. Capture supplier transactions allocation volumes and BOL with an automatic feed into TransactionRite.

## Fuel Order Management & Dispatch (FOMD)

Produce orders and feed to TransactionRite for billing, with a facility to record nonelectronic deliveries and match them against BOLs.

### MobileRite

Feed electronic load and delivery transactions automatically to TransactionRite along with document images and signatures.
