

## MobileRite

### Automate your fuel dispatch communication, delivery and document flow using a mobile app

Axxis MobileRite provides an in-cab solution for easy two-way communication with drivers on the go.

#### WHO WE HELP

Retailers

Wholesalers & Jobbers

Dispatchers

Drivers

#### COMMODITIES

Gasoline

Diesel

Propane

#### MARKET SEGMENT

Rack

Retail

#### Market Challenge

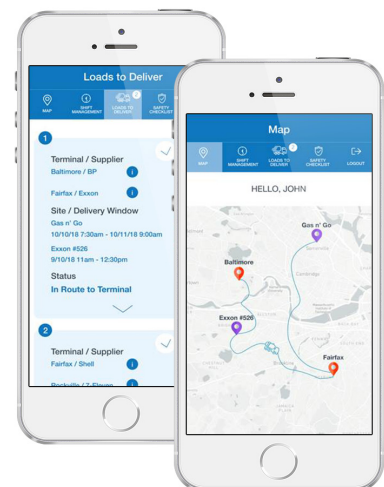

In the past, communicating fuel delivery details and related paperwork to drivers entailed radio calls, manual effort and faxing, back and forth. The process improved as cellular technology advanced, but hardware is expensive, connectivity is sporadic and applications are typically difficult for drivers to use.

#### How We Help

Axxis MobileRite solves hardware cost, connectivity and usability problems through a mobile app that gives drivers an intuitive way to access orders, sourcing and delivery information. The app allows easy communication of instructions to drivers, who can then return critical fuel transaction data in real time to accelerate customer billing.

#### Benefits

- Pre-populated order and sourcing data speeds entry of pick-up and delivery information
- Leverage mobile app technology to utilize enhanced mapping and routing features
- Loads and orders are automatically transmitted and matched to supplier BOLs for real-time billing and reconciliation
- Central dashboard view for dispatcher to monitor drivers, trucks and sites, with ability to drill in to specific assets
- Works off-line and syncs when connectivity is lost

## MobileRite Feature Overview

Key Features	Benefit to Customer
Summary View of Loads	<ul style="list-style-type: none"><li>Electronic to-do list for drivers: where to go and what to do</li></ul>
Fuel Inventory Integration	<ul style="list-style-type: none"><li>See latest fuel inventory levels with ATG reading</li></ul>
Driving Directions	<ul style="list-style-type: none"><li>Locate hard-to-reach locations and provide site-specific instructions without calling for directions</li></ul>
Safe Drop Tool	<ul style="list-style-type: none"><li>Ensure that driver doesn't drop fuel into a tank where fuel won't fit or water levels are too high; prevent overfills, cross drops and phase separation</li></ul>
BOL, Fuel Delivery and Document Capture	<ul style="list-style-type: none"><li>Accelerate original document return to office</li></ul>
Customer Signature Capture	<ul style="list-style-type: none"><li>Proof of delivery</li></ul>
Email or Print Delivery Tickets	<ul style="list-style-type: none"><li>Provide customer proof of delivery in format they prefer</li></ul>
Dispatcher View	<ul style="list-style-type: none"><li>Interactive control center where dispatcher can view driver/truck GPS location, allocation status, contract status, fuel inventory records, load status in order to make real-time decisions</li></ul>
Time Tracking	<ul style="list-style-type: none"><li>Track driver hours</li></ul>
Safety Inspections	<ul style="list-style-type: none"><li>Customize and document safety procedures</li></ul>

## Related Axxis Software Modules

Module	How They Work Together
Fuel Order Management & Dispatch (FOMD)	<ul style="list-style-type: none"><li>Provides a central dashboard for the home office to source loads and schedule drivers. Distributes fuel orders and assigned loads to drivers, publishes delivery information back to the home office when complete.</li></ul>
TransactionRite	<ul style="list-style-type: none"><li>Receives transactional documents from drivers, then files them in an electronic "cabinet" to provide a real-time record of fuel delivered</li></ul>
